“My goal is to encourage people dare to be different - active, original, unique and share it with our loved ones.

What comes around goes around!

I have learned how to make real returning boomerang from my father who has been perfecting the craft of boomerangs for more than 20 years. I remember when I was a kid how much fun it was to test new father's boomerangs in parks and open fields. For me it was always surprising how a wooden stick without modern technologies can fly, make a big circle in the air and then accurately come back to me. 7 years ago I started making my own boomerangs. I remember the first time when I made a boomerang which actually returned, that moment remains to me as one of the most memorable and satisfying in my life. Since that date I have now made more than 1500 boomerangs which has been shipped all over the world.
